Vertical Farming System

Vertical Farming System is a revolutionary agricultural technology that allows for the efficient production of crops in a controlled environment. This system utilizes vertical space, enabling high yields per square foot. It is ideal for growing leafy greens, herbs, and other fast-growing plants. The system is designed to be scalable and can be integrated into various urban and industrial settings. The following image shows a close-up view of the vertical farming system, highlighting the dense arrangement of plants and the efficient use of space.

Vertical Farming System: A revolutionary agricultural technology for efficient crop production in a controlled environment.

Vertical Farming System

1. 在 2024 年 12 月 31 日，本公司 ABS 的到期日为 2024 年 12 月 31 日。

2. 本公司在 2024 年 12 月 31 日的总资产为 100,000,000 元，其中流动资产为 80,000,000 元，非流动资产为 20,000,000 元。
