Vertical Farming System

Vertical farming is a method of growing crops in vertically stacked layers, often in a controlled environment. This system allows for year-round production, reduces the need for pesticides, and conserves water. The plants are typically grown in a nutrient-rich solution, and the system is designed to optimize light and space efficiency.

Vertical Farming System

Vertical Farming System

1. 检查 ABS 系统是否正常工作。如果 ABS 系统出现故障，可能会导致制动系统无法正常工作。

2. 检查制动油液位是否正常。如果制动油液位过低，可能会导致制动系统无法正常工作。
