3D printing material selection

---

3D printing material selection. ABS and HIPS are common materials used in 3D printing.

ABS is a thermoplastic material known for its strength and durability. It is commonly used in 3D printing for functional parts. HIPS is another thermoplastic material that is known for its high impact resistance and ease of post-processing. [ABS 3D printing material selection](#) is a common choice for many 3D printing applications.
