

China Best Cheap 20-200cm Dia Black PVC Plastic Root Control [Air Pruning Pot](#) For Trees

Air Pruning Pot specifications: Diameter 20-200cm, Height 20-70cm, can be customized according to customer requirements

Air Pruning Pot Introduction

- Made of PVC material, with a service life of more than 3 years
- The product consists of a bottom plate, a surrounding edge and a screw buckle
- The bottom of the container has the function of controlling the main root winding.
- The surrounding edge is concave and convex alternately, and there are small holes on the outer top to provide conditions for air pruning

Air Pruning Pot Features

- **Obvious root increasing effect**

Affected by physical properties, the lateral roots of seedlings are greatly increased, the total root volume is 30-50 times larger than that of field seedlings

- **Effectively control root development**

Using the principle of air pruning, it effectively limits the development of main roots, promotes the development of lateral roots, overcomes the defects of packing and root damage during transplanting, and the survival rate is over 98%.

- **Significant growth-promoting effect**

Affected by container root control principle and substrate, the seedling period is

shortened by 30-50% compared with conventional ones.
