- Provide free drawings design service
- Made from PS material, No-toxic and environment friendly
- Modified with special formula, strong flexibility and durability
- 0.7~1.5mm thickness trays can be produced by [china vegetable plant starters manufacturers](#)

Yuyi Seed Trays Features

Air Holes - Air circulation up and down the cell tray keeps leaves dry and prevents disease

Root Guide Groove - The inner wall of the hole is conducive to the vertical growth of plant roots and prevents root entanglement

Overflow Groove - Keep the water balance in each cell and the plant grows neatly

Cell Bottom Design - The design of small grooves or bumps at the bottom can make the cell tray seep water quickly
