Yuyi Seed Trays Features

Air Holes - Air circulation up and down the cell tray keeps leaves dry and prevents disease

Root Guide Groove - The inner wall of the hole is conducive to the vertical growth of plant roots and prevents root entanglement

Overflow Groove - Keep the water balance in each cell and the plant grows neatly

Cell Bottom Design - The design of small grooves or bumps at the bottom can make the cell tray seep water quickly

Seed Tray Manufacturing

From 3D drawing design, Mold carving, Plastic sheet extrusion, Vacuum Forming, Trimming, Drilling, to Packing, all processes are produced in our own factory. So, we are price terminator (the most competitive price in China).
